

# E-commerce & Supply Chain

## E-commerce & Supply Chain

eCommerce is the future of retail. Statistics have indicated that in 2020, there were over 150 million people who shopped online for their first time. The number of eCommerce consumers are expected to grow in the next few years. With the increase in demand for eCommerce, it's expected that companies will have to enter the digital space to continue to compete.

eCommerce supply chain is made up of a series of logistic processes.

- Procurement of raw materials
- Manufacturing of finished products
- Warehousing
- Fulfillment
- Inventory management
- Last mile delivery

OneHub Business Consulting provides you with the tools to successfully develop an eCommerce business from the website & social media to "pick & pack" logistics. This would also include the implementation of CRM, POS systems, and inventory management systems.
